

# **Situation Update Report Beluga 61**

**Commisar-Captain  
Rabidus Matias**

## **Situation Update Report**

In the everlasting glory of His name, I humbly submit this Situational Update Report, to you, for perusal at your leisure. First I would congratulate you Sir upon your promotion to the rank of Lord-Commissar. A more fitting exemplar of service to our divine lord and master, for which to lead the commissariat in this subsector, can not be found.

As you, in your wisdom, is already aware of the mission to pacify Beluga 61 has met with some degree of difficulties. Our formerly esteemed commander, the Lord-General Mcdoofus, bears much of the blame for the situation in which his Imperial Majesties forces now find themselves. It was therefore my solemn duty to summarily execute the Lord-General for incompetence of command after the debacle that was the initial landing was concluded. His former XO, the now field commissioned Lord-General Darius, is now sanctified to command the Imperial Task Force to Beluga 61. As of yet, there has been no need to execute the field commissioned Lord-General, any changes to this situation will be reported without undue delay.

The situation as of now is, as I report with a large degree of sorrow and shame, inconclusive. There have been no breakthroughs on the frontlines and the situation can now best be described as a stalemate. Even the deployment of the task forces last remaining Leviathan, the noble and grand Necis Omnium, did not bring about a decisive victory. Sad to say the deployment and actions of the Necis Omnium did little more than securing our ability for further operations on Beluga 61 and space for reorganizing the force. Unfortunately the Necis Omnium, with its long and outstanding history of service to the Emperor, having seen battle and decimated the foes of the Emperor on no less than 23 different worlds in the last century alone, sustained substantial damage and is in need of a complete overhaul by the tech Priest of Mars before it once again can be fielded to lay the fiery wrath of the emperor upon those who are deserving of such.

### **The current situation:**

#### **Civilian situation**

The civilian population, or what remains of it, has now sunk further into decrepitude. On a positive note the plagues and famine that ravaged the population has diminished some, although this is mostly due to the fact that the majority of those within the population so affected has now perished. Although the dead litter the streets as rotting bags of puss and pestilence, the brave soldiers of the imperial engineering regiment, attached to the Task Force, has mostly been able to plough them aside so as to allow our usage of relevant roads.

What now remains of the population is increasingly swaying in support towards the Liberation Front. An affront to the Golden Throne that seems to continue unabated no matter how many heretics that are publicly tortured and/or executed by the remaining Adeptus Ministorum on Beluga 61. Although the Ministorum is to be commended for their diligence of service, in some districts one cannot swing a whip on the backs of the retreating serfs without hitting a strung up heretic swinging from a lamppost, one can not help but wonder if their actions, for some unfathomable heretical reason, perhaps is not swaying the hearts and minds of the remaining population.

None the less, a serious discussion as to the future of Beluga 61 should commence without undue delay. Perhaps a way of continuing Beluga 61 contribution to Imperial society would be the establishment of the planet as a penal colony after a complete purge of the current population. But this I leave as a matter for the Administratum.

#### **Enemy situation:**

##### **Liberation Front:**

The "organization" referring to itself as the Belugan Liberation Front has since my last report consolidated its organization around a single focal point. A leader has arisen that seems to have beaten down the other factions within the liberation front. This leader has been identified as a former adept of the Adeptus Mechanicus and has been broadcasting messages of change for which the populace to believe in, since his ascension. This former adept is supported by a powerful group of heretical techpriests and skitarii. There has even been reports of a household of Knights walking in support of this HERETICAL HERESY! That such noble machines created to bring the light of the Emperor into the darkness of space and burning all that resides therein into delectable crisps, is almost more than a loyal subject to the absolute will of his August Imperial self can handle. BUT WE SHALL PERSEVERE, BY OUR BOLTGUNS, CANNONS AND TANKS ALL WHO DOUBT THE EMPEROR SHALL KNOW OUR MERCY, OF WHICH WE HAVE NONE!!!

##### **Separatist movement:**

Following the actions against the Necis Omnium, in which the foul xeno scum backing the Separatist Movement for the first time broke through the cowardly screen of smoke and misdirection covering their operations, broke down as a coherent organization. The xenos lost what remained of the human allies on Beluga 61 and they now stand truly as what they are, alien invaders supporting a weak puppet regime. As the Hussaries supporting the separatist saw their alien overlords for what they were, just that alien overlords, they broke ranks and attempted to return to the loyalist side. They were of course executed to the last man for daring to raise arms against their Emperor.

The separatist remains now as only a puppet council attempting to garner support, and speaking on behalf of the xenos. Attempts have been made to break through and arrest or destroy the separatist council in order to cease their constant stream of heretical propaganda, but a constant barrage of missiles fired by the xenos warmachines has thwarted our attempts. Continued action towards the council will be attempted by more covert means.

##### **Unknown Xenos:**

The unknown xenos which were reportedly roaming the desolate wilds of Beluga 61 seems to have multiplied exponentially during our operations. They are now threatening even the most well guarded facilities and locations. Also the size of the individual creatures seems to have swelled as well as there has been reportings of creatures as large as an Imperial knight wandering the wilderness. Even though such reportings are obviously exaggerations or fabrications the number of such reports forces me to bring them to your attention. But this threat will be dealt with as soon as the our opposing factions are destroyed.

##### **Own situation**

What remains of the former PDF of Beluga 61 has now been enveloped into the Imperial Guard under the name The Last Regiment of Belugan Hussary. The current state of Beluga 61 precludes the raising of further troops from the population.

Seeing that elements of the local Adeptus Mechanicus has broken their holy oaths, and sided with the Liberation Front, the forces of the Machine God has rallied to our support and have deployed the Baronial Court of House Tanar Kii. House Tanar Kii consisting of numerous Imperial Knights have already taken to the field and brought the anger and dissatisfaction of the Emperor upon His enemies in the forms of a cascade of fire and destruction rained upon all those foolhardy enough to stand in the way of such beautiful incarnations of death and destruction. Although some hiccups was experienced along the way as, during an encounter with the xeno warmachines, the cascade at one point seems to have vented from the side armour of one holy engine of destruction and taken its compatriot down in the conflagration. But even though one sometimes must break some eggs when preparing Imperial omelettes, the Task Force as one is eagerly anticipating the time when the House of Tanar Kii finally engages the their corrupted former brethren and once and for all brings them to task.

The Task force will for the duration of this next reporting period be conducting increased covert operations against the leadership and supplies of both the Liberation Front and Separatist Movement in order to undermine their war sustaining effort and increasing the effectiveness of our own operations. Unfortunately it seems they have come to the same plan as cases of sabotage and assassination of higher officers have increased exponentially in the time since the battle of Necis Omnium.

Thus concludes my report in the Holy name of the ever-luminescent Emperor. The future of Beluga 61 is as of now uncertain, but I am certain that with His guiding light and the righteous anger of His true believers we will be victorious.

Ever loyal and truly Yours

Commisar-Captain Rabidus Matias  
Staff Commisar to the Beluga 61 Task Force
